PROJECTS

HAS

Hiring as a Service

Hiring as a Service - is a comprehensive hiring management platform that streamlines the entire recruitment process from job posting to employee onboarding.

Qoon Express

A social commerce platform designed to streamline shopping experiences by integrating various stores into a single

Qoon is a social commerce platform designed to streamline shopping experiences by integrating various stores into a single, user-friendly interface. The platform allows users to discover, interact with, and purchase from local stores, offering features like personalized interactions, secure transactions, and instant rewards. Qoon leverages advanced technologies such as artificial intelligence to provide tailored offers and high-performance servers to ensure quick content delivery

DRA - DIGITS REALITY FOR ADVERTISING

DIGITAL MARKETING AGENCY

DRA Agency

Delivered a responsive, high-performance frontend for a full-service digital marketing agency. Built reusable UI components (service cards, hero sliders, contact forms), ensured seamless navigation across devices, optimized site speed through asset compression and lazy-loading, and integrated with backend APIs to support dynamic content & SEO.

TRP

A company specialized in providing integrated technical solutions

TRP

Developed a responsive and high-performance frontend interface for TRP, software company platform. Implemented advanced product listing and search filters, responsive design across devices, reusable UI components, performance optimizations (lazy-loading, image management), and seamless API integration with the backend.

KASCCO Group

KASCCO provides comprehensive workforce management, construction manpower, manufacturing support, and e-commerce logistics solutions across Saudi Arabia

Kascco Group Website

Developed the responsive, modern frontend interface for kascco.sa [!\[\]\(83bbbd261710c59db0214aa27b2edc0d_img.jpg\)](#)

, a corporate website for a Saudi B2B solutions provider. Built reusable UI components, ensured cross-device responsiveness, optimized SEO and page load performance, and collaborated closely with backend and design teams to ensure a seamless and user-friendly experience.
